#### **ICFA MEETING**

25/26 February 2016

J-PARC

## 1. Announcement

Roy Rubinstein has stepped down as ICFA Secretary after 23 years in this position. Pushpa Bhat (Fermilab) has been appointed Secretary for a five-year term.

2. <u>Global Planning for HEP, including a 100 TeV Collider and Accelerator Neutrino Projects</u>

Yifang Wang described the status of CEPC, where work is progressing towards a Conceptual Design Report (CDR) in 2016; the accelerator will be partial double-ring. The status of FCC was discussed by Fabiola Gianotti; it will be a ~100 km ring with 16 T magnets; an e+e- collider ( $\sqrt{s}$  = 90 - 350 GeV) is a possible first step. The CDR is expected by the end of 2018. The current status of DUNE and LBNF was presented by Nigel Lockyer; the far detector will be four underground 10 kT (fiducial) liquid argon TPCs. The first far detector installation is expected to begin in 2021.

#### 3. LCB Mandate

The Mandate of the Linear Collider Board (LCB) and the Linear Collider Collaboration was extended by ICFA last year to the end of 2016, with the hope of a signal on ILC approval from the Japanese government during 2016; since there appears likely to be no such signal in that time frame, a major issue for ICFA is how to keep the linear collider effort going for the next ~ 2 years. Discussions will continue at future ICFA meetings on a new mandate.

4. <u>Proposed ICFA Collaboration with the Astroparticle Physics International Committee (ApPIC)</u>

ICFA endorsed an ApPIC suggestion for closer ties between the two committees, and representatives of each committee will in future attend some of the other's meetings.

### ICFA Panels

A discussion was started on ICFA Panels, their mandates, and the issue of time limits on the durations of Panels and their memberships. A new ICFA Panel on Sustainable Accelerators and Colliders was proposed.

# 6. Reports

Reports were made to the ICFA meeting by FALC, InterAction, the ICFA/ICUIL collaboration, ICFA Panel representatives, and members of the labs, countries, and regions represented at the meeting.
